

Danil Tkachenko

.NET Python AI/ML Engineer

Profile

Passionate and results-driven Developer with a proven track record of delivering robust, scalable solutions. My motivation comes from a deep commitment to innovation and continuous improvement, always aiming to push the boundaries of what's possible. Proficient in C# Python .NET, and cloud technologies, I thrive in dynamic environments where I can leverage my skills to drive impactful results.

Employment History

AI/ML Engineer C# Python at NN, Prague

February 2025 — Present

- **Automated payments OCR pipeline:** Designed and deployed an OCR module that extracts text from our large dataset, streamlining automated payments to insurance customers across the Czech Republic.
- **NN AI bot:** Currently building a business-specific conversational agent that uses Microsoft Semantic Kernel to orchestrate and execute our internal business tasks via AI workflows.

Cloud Software Developer at Continental, Otrokovice

October 2023 — February 2025

- On-site with the Special Global Team
- Development Continental Cloud company's mission-critical Cloud that operate seamlessly across all continents and in nearly every country worldwide. These services range from powering advanced automotive applications to providing robust support for software that drives entire factories, ensuring reliability and performance on a global scale.
- Experience with problems of large scale, and handling millions of connections, including in a high-volume or critical production service environment

Software Developer at GETMORE, Zlín

March 2022 — October 2023

- On-site as a primary developer
- Responsible for the full development cycle of mobile and web applications. This includes everything from initial development to publishing, as well as creating and managing certificates for marketplaces like the AppStore, PlayMarket, Alza
